Uni cuts science degrees, no job losses planned

By John Lewis and Grant Miller

News > Dunedin > Campus

The University of Otago will phase out its bachelor of applied science programme from the start of next year.

For the applied science degree, students were required to major in at least one of a list of subjects, which included **agricultural innovation**; applied geology; aquaculture and fisheries; computational modelling; consumer food science; data science; energy management; environmental management; forensic analytical science; geographic information systems; molecular biotechnology; physical education, activity and health; software engineering; and sport and exercise nutrition.

Food & Agriculture Student Association launch

By Shawn McAvinue

Rural life

Charlotte Lewis, Caitlin Harley, both of Auckland, and Tamsyn Grainger, of King Country.

The Food & Agriculture Student Association launched at an event on the University of Otago campus in Dunedin last week. Association president Supriya Sally, in her opening speech at the launch, said the vision of the association was to empower students passionate about food and agriculture and bringing positive change for a sustainable food and agriculture sector, fostering nourishment, equity and harmony, guided by knowledge, innovation and community engagement.

Shawn McAvinue photographed some of the more than 50 people at the launch.

Job opportunities along the farm to fork value chain

Rural and Urban Divide a Myth

The Diverse Experiences of Farming project asked New Zealanders – urban and rural – what they really think about farming. It found no deep divide. Aotearoa New Zealand values our farming sector.

[About Us](#)

[Contact Us](#)

QCONZ Auditor

Kerikeri, Northland

We are looking for our next superstar who is passionate about supporting our local industries. Having some background knowledge of agriculture, farming or quality assurance will be advantageous, however this is an entry level position, and full training will be provided.

[SEE LISTING >](#)

QCONZ Auditor

Whanganui Central, Manawatu

We will help you kickstart your career by building your knowledge of quality compliance within the agriculture industry, developing your auditing skills, and helping you to become a technical expert in your field.

As a successful applicant you will receive comprehensive training and to become a Recognised Farm Auditor. Once accredited you will work from home, using your company vehicle to visit farms throughout your region.
