

# Flower dissection sheet

Lay out your flower parts within the relevant boxes and label them. Attach them to the sheet with a tiny amount of glue, allow the glue to dry, then press and dry the sheet between paper towels. Display.

## Learning Intentions:

- Learn to dissect a flower and identify its parts.
- Understand the functions of each of the parts and functions of a flower as a whole.

Flower type: <input type="text"/>		(If you don't know what it's called, take a photo or make a drawing.)
Drawing of whole flower		Pistil (label the stigma, style and ovary)
Stamens (label the anthers and filaments)		Petals
Sepals		Receptacle and stalk (use a thin slice of this part; label the receptacle and stalk)
