

How do these seeds disperse?

Use the pictures below to decide how each seed is dispersed. For each one explain why, and list the special features (adaptations) that allow it to disperse this way. Some disperse in more than one way.

Learning Intentions:

- Use observations and reasoning to make inferences.
- Discuss, argue and defend your inferences.

Wheat

Rowan

Thistle

Sycamore

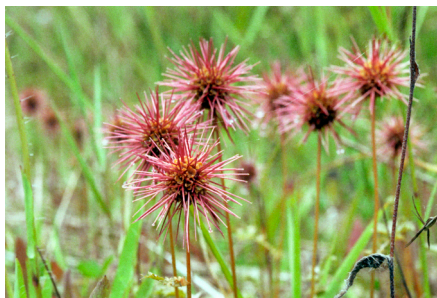

Tōtara

Oak

Kareao/Supplejack

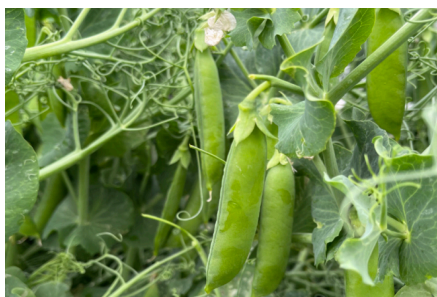

Hutiwai/Bidibid

Pine

Raupō / Bulrush

Pea

Kamu / hook grass

Coconut

Apple

Harakeke / NZ flax
